

Promotion D: miRCURY LNA miRNA starter kit and Spike-in assay

miRCURY® LNA® miRNA PCR System LNA-enhanced PCR system for unmatched sensitivity and specificity

- Superior sensitivity - reliable quantification of individual miRNAs from as little as 1 pg total RNA
- Superior specificity - LNA-enhanced primers enable target differentiation by a single nucleotide
- Minimal false-positives and sensitive detection, regardless of AT content
- Easy-to-design custom products using the online LNA design algorithms and tools
- Accurate miRNA profiling in 96- or 384-well plates using just 20 ng total RNA
