Agenda

10:00-10:30 CEST **Simplify your secondary analysis to 5 steps**

Michael Furness, Professional Customer Solutions Manager, QIAGEN Digital Insights

- Variant calling, filtering and visualization: Structural variants, indels, point mutations
- Quality control reports
- Get started quickly with configurable pre-made workflows

10:30-11:15 CEST **Generate oncologist-ready clinical reports from comprehensive cancer panels within minutes**

Ruth Burton, Ph.D., Clinical Field Application Scientist, QIAGEN Digital Insights

- Why high-quality, deeply curated knowledge is necessary to boost your molecular tumor boards?
- How does QCI interpret the effect of co-occurring variants on prognosis and diagnosis?
- How can you identify incidental findings in QCI?
- How does QCI display and interpret structural variants?
- How does QCI handle multi-sample analysis?

11:15-11:45 CEST **Going beyond: Molecular evidence for off-label therapy use**

Kathryn Bungartz, Ph.D., Professional Clinical Solutions Manager, QIAGEN Digital Insights

- Using molecular pathways to expand therapy options
- Identifying evidence-based therapy options for cancer patients for whom there is no on-label therapy
- Providing confidence with expert-curated, oncologist-reviewed treatment strategies
