

Uncovering the microbial world – research, public health, surveillance and diagnostics

Join us at Booth #1401

Whether you work in human, environmental or agricultural microbiome research, public health, diagnostics or microbial surveillance, our products deliver reliable and repeatable results.

You can benefit from our:

- Products from disruption to digital analysis that work seamlessly together and are easy to use
- Kits designed for specific sample types, including the most challenging ones
- Analytical portfolio, including NGS, dPCR and reliable microbial assays

Be sure to visit our **Microbial Surveillance and Detection Science Showcase on Sunday, June 16, 12-12:45 p.m. in Theater A** with QIAGEN experts and leaders in the field.

Celebrate

Culture-free MTB sequencing

QIAseq® xHYB *Mycobacterium tuberculosis* Panel allows for the comprehensive whole genome sequencing of tuberculosis without the need for cell culture.

Discover

Higher RNA yields from soil

With efficient bead beading and lysis of up to 15 g of soil, the RNeasy® PowerMax® Soil Pro Kit is designed to ensure high RNA yields from all soil types, including low-biomass samples.

Learn

Join our microbial surveillance Science Showcase

Learn how to use dPCR to increase sensitivity and precision for microbial surveillance and detection. Join leaders in the field.

Sunday 16 June,
Theater A,
12:00 p.m.

Explore

Use digital PCR in various applications

From detecting *Salmonella* in poultry to spoilage yeasts during wine production to quantifying GMOs, these short talks will show you the way.

Try

All-in-one WGS SeqSets

Powerful bundles to simplify the entire sequencing process, from extraction to library preparation and analysis – minimizing bias and providing clear results.
